Hello Ron,
Please save this to SEMS for Smokey Mountain Smelters.
Thank you,
Scott

Scott,

I just looked at the attached property map that Rimmer Brothers included in their response and the eastern part of the parcel that they claim ownership of, D.135-C, contains about one third of the waste pile at the site. It did contain even more before some of the saltcake was moved up to the concrete slab of the former main building during the EPA removal action.
